

DON'T MISS OUT ON AUTUMN SALE !

Fit for autumn. Tool up
with limited-time treats

NILFISK

Save now on safe cleaning

Autumn is on its way – and so is the need for autumn cleaning. Tool up with these limited-time treats on powerful high-pressure washers, scrubber dryers, and industrial vacuum cleaners to keep your working environment spotlessly clean and safe.

All our cleaning tools are fit for high-efficiency and resource-saving cleaning in sectors like automotive, agriculture, and building & construction where microbial threats and hazardous dust need the right equipment and professional handling.

Jumpstart autumn and tool up now. The limited-time treats end on the 16th October 2024.

The top 5 for perfect autumn cleaning

For perfect cleaning, the connection between five factors is crucial. If one factor is reduced, another has to be increased. Optimal balance provides both highly effective and time- and resource-saving cleaning results.

PRESSURE

The force required to loosen dirt from a surface.

AMOUNT OF WATER

Water is crucial as a carrier for pressure, temperature, and cleaning agents.

TIME

Both contact time and working time influence the removal of the dirt.

CHEMICALS

Cleaning and care products accelerate the cleaning process and serve for disinfection and care.

TEMPERATURE

Oily, greasy, and waxy substances can be loosened more effectively and quickly with higher temperatures.

Agriculture

To a vital sector such as agriculture, biosecurity is crucial. Microorganisms like bacteria and fungi can be transmitted through surfaces and soil and therefore thorough cleaning is key to protecting public health, securing food safety, and maintaining economic stability. A hot water high-pressure washer leaves your surfaces immaculate – a cold water high-pressure washer gets any daily job done quickly and reliably.

Equipped with power

They're efficient, versatile – and essential. With a cleaning impact of up to 10,6 kg, high-pressure washers get the job done, no matter the task.

A hot water high-pressure washer effectively removes even the most stubborn dirt, germs, and greasy substances, while a cold water high-pressure washer is your go-to for daily all-around use where hot water is not needed.

A **hot water high-pressure washer** is a multiple-purpose tool, use it for:

Machines and vehicles

- Remove dirt, grime, grease, and oil, and maintain the efficiency and productivity of your machines
- Clean grain silos, bins, and barrels
- Prevent contamination through deposits and fermentation residues (wine production)

Stables, milking parlours, and slaughterhouses

- Eliminate bacteria, germs, and viruses effectively from the milking parlour, free-stall, breeding pools, and other stable facilities
- Eliminate bacteria, germs, and viruses effectively in slaughterhouses to meet the high legal requirements and regulations

Livestock farming

- Protect animals from harmful organisms and diseases
- Eliminate bacteria, germs, and viruses
- Remove excrement, soiled straw and hay, and leftover fodder

General work around the farm

- Clean work routes and yard areas
- Remove dirt paths and loading areas
- Remove straw and leftover fodder

A **cold water high-pressure washer** is a general cleaning purpose tool, use it for:

Various cleaning tasks

- Clean courtyards, buildings, and patios
- Clean vehicles, machines, and tools and maintain their efficiency and productivity
- Clean large surfaces like building exteriors, sidewalks, and driveways
- Remove dirt and stubborn algae from fences, porches, and patios
- Strip away paint
- Clean off heavily layered mud and debris

Building & Construction

At building and construction sites hazardous dust like silica, asbestos, and metals pose a severe risk to workers' health and safety if not handled properly. To manage hazardous dust effectively and to ensure a safe workplace, you need a powerful industrial vacuum cleaner with a high-quality filter that can also stomach somewhat rough handling.

The silent, invisible daily threat

Working in Building & Construction you don't question wearing hard hats and safety shoes, do you? The threats are obvious. Unfortunately, hazardous dust is not, it's often invisible.

Even more unfortunate, this fine and toxic mixture of materials and tissue in many cases comes from ordinary building materials that workers use daily and therefore experience continued exposure:

- **Gypsum boards**
- **Concrete, rocks, sandstone, bricks, and mortar**
- **Wood dust**
- **Metal dust**

All silent, potential killers without proper training and equipment. You may not think of it now since these health issues often have a very slow progression, but long-term dust exposure can cause health issues like asthma, COPD, silicosis, and even lung cancer.

To beat this silent, invisible everyday threat, look for a vacuum with best-in-class filtration built to the highest safety standards during use and maintenance suitable for recovering and disposing of hazardous construction dust.

Automotive

Spotlessly clean radiates professionalism, increases profit, and reduces safety concerns. Dealerships, workshops, and petrol stations are all high-traffic areas with heavy foot activity, all accumulating a lot of dirt and grime, coarse dirt, and oily coatings. To leave a lasting first impression, you need a high-powered floor cleaner.

Slippery when greasy

Did you know slips, trips, and falls are the most common reasons for accidents at work? Spills from liquids such as oil are one of the main reasons and can cause painful fractures, strains, and head injuries, but also costs due to sickness absence.

Equipped with power

No matter the task, a high-powered floor cleaner does the job. Due to a wider scrubbing path, it's faster because it covers more ground increasing productivity. It's more efficient, costs very little to run, and even easy to operate. Take it away for:

Dealerships

- Make showrooms shine
- Clean meeting rooms, and offices
- Clean car parks and outdoor areas

Workshops

- Remove dirt efficiently
- Ensure workspace safety and remove oil and grease spills
- Clean workshop and storage areas to maintain productivity

Petrol stations

- Remove liquids from the floor and ensure workplace safety
- Ensure hygiene in the shop
- Eliminate germs, viruses, and bacteria in counter and sanitary areas

24 V

Rated Power
500W

This machine offers both forward and backward scrubbing and drying with an impressive brush pressure of 30 kg. Particularly suitable for cleaning in crowded places, between and behind tables, shelves, furniture and other less accessible areas.

- Powerful brush motor & better suction performance
- A re-designed deck ensures reliability and increased performance with low maintenance costs
- Optima batteries are available offering high productivity, constant performance, lower weight and more environmental friendliness due to the use of less lead
- Easy deck adjustment for perfect traction control

This high-productivity, versatile, commercial ride-on scrubber dryer is perfect for cleaning both large, open spaces as well as small, as its compact-design makes it easy to manoeuvre in narrow spaces, and able to pass through standard-sized doorways.

- Disc decks available in 71cm or 86cm and cylindrical decks available in 71cm or 81cm
- Clean inconspicuously any time – even in congested environments due to best-in-class turning radius, a compact profile, and quiet operation.
- Ensure high-quality cleaning every time, regardless of soil level, with SmartFlow™ technology that adjusts the solution flow

This machine comes equipped with a simple robust and corrosion proof stationary unit for permanent outdoor placement, as well as being frost protected (down to minus 20°C) for use even in winter. Enabling constant cleaning of trucks, vans, commercial and construction vehicles. All setting and adjustments are inside the lockable cabinet, making the unit suitable to be placed in areas such as parking and forecourt. The unit is then easily operational for multiple users with 4 push button function to select on-off, hot water, detergent without needing to adjust each time.

- High efficiency EcoPower boiler offering reduced fuel consumption and costs

About Nilfisk

Nilfisk was founded in 1906 by the Danish engineer P.A. Fisker. Today the company is a world-leading global provider of professional cleaning equipment and services. More than 90% of sales are to professionals while the remaining part of the business aimed at consumers covers floorcare equipment, vacuum cleaners, and high-pressure washers.

Nilfisk's products and services are sold in more than 100 countries and produced at 9 manufacturing sites across the globe. The main production facilities are in the US, Mexico, Hungary, Italy, and China. A total of approximately 4,700 employees secured revenue of 1,033.6 mEUR in 2023.
